

SSS1000 TOWED SWEEPER

Tractor Mounted Sweeper

SSS1000

Sweeping up the debris

Regular cleaning of synthetic surfaces is vital to avoid contamination of the surface and remove potentially harmful debris before play. The SSS1000 sweeper features a spiral rotary brush. Debris is swept into a mesh hopper that allows pitch infill to be returned to the surface.

Sweeping will also pick up any loose fibres that may be common place in the early weeks after installation.

SSS1000

Code:	F51079
Working width:	1000mm (1m/40")
Power unit requirement:	12hp minimum

FULL SPECIFICATION AVAILABLE ON
www.sisis.com

KEY NOTES:

- Essential to remove organic debris before it contaminates the surface
- Important to remove any litter and potentially harmful debris before play
- Brush height is easily adjustable without tools
- Fast work rate helps to keep surfaces in play
- Adjustable drawbar which lifts upright for easy storage – ball or jaw hitch
- Wheel drive to the brush is disengaged by simple “pull & twist” clutch levers on each wheel for transport between sites
- Unique spiral brush design reduces vibration and ensures constant brush contact with the surface

In action leaving a clean surface

Simple “pull & twist” clutch levers on each wheel to disengage wheel drive to the brush during transport

Easy to remove hopper and unwanted debris

Brush height is easily adjustable without tools
